DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Monday, 12 August 2024 at 01:54 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Areas of Moderate air pollution are expected in parts of eastern and southeastern England. Northern and western parts of the UK should retain Low air pollution levels, aided by more unsettled conditions here.

Tomorrow: Air pollution levels should largely revert to Low, however localised pockets of Moderate may survive in the far southeast of England.

Outlook: More unsettled and breezy conditions expected in this period should help lead to generally Low air pollution levels.
